EXPERIENCE

Senior Frontend Developer — *Rotate, Israel*

April 2024 – Present

- Built new features into a production application running on React and NextJS written in Typescript.
- Wrote end-to-end tests for both existing features and newly added to increase product reliability.
- Investigated and provided creative solutions to fix the performance of non-performant pages which improved the user experience of the application.

Senior Frontend Developer (Contract) — *Frostwork, UK*

March 2024 – September 2024

- Built new features into production applications using React, NextJS, written in Typescript.
- Rebuilt a NextJS application which had bloated business logic and outdated packages with simplified code and updated tooling.
- Investigated and fixed difficult to find bugs in a production application and implemented UI performance optimization.

Senior Frontend Developer (Contract) — *Effect Studios, Ghana*

December 2022 – March 2024

- Built maintainable web applications with React (Next.js), Vue (Nuxt 3) and Typescript, and documented with JSDocs to enhance developer experience and application maintainability.
- Built emerging features into an existing application in production at client's request which resulted in no downtime for client's customers.
- Implemented performance optimizations to reduce application load time and improve user experience.

Frontend Developer — *Enyata, Ghana*

November 2021 – February 2025

- Built and maintained component libraries with React, Vue 3 and Typescript to speed up the development of web applications which resulted in faster delivery by the team.
- Optimized application load time by implementing code-splitting and pruning third-party library usage.
- Wrote unit tests for UI components and views to ensure they behave as intended using Vitest.

Full Stack Developer, *Freelance*

October 2020 – October 2021

- Built and maintained a membership and attendance application that helped the client manage a total of 600 members and allowed instant member verification which previously was not possible.
- Created tasks according to project requirements for backend and frontend implementations to serve as a guide for the development process which resulted in honoring project timelines.
- Hosted and integrated Postgres databases on AWS RDS with Django backend to persist data for applications.

Frontend Developer, *Freelance*

April 2018 – October 2020

- Designed and developed user interfaces for multiple institutions, optimizing each to enhance user experience.
- Deployed five (5) marketing websites that saved their owners' time by answering the questions that block clients from taking action with no additional effort from owners.
- Developed fully responsive websites ensuring compatibility with a wide range of device viewports which resulted in an improved user experience using HTML, CSS, JavaScript, and React.

PROJECTS

Wellvo Lab AI (<https://ai.wellvo.co/>)

A platform where users can upload medical reports and have them analyzed by a third party AI package.

Frontend Stack: React, Next.js, Typescript, Tailwind CSS, jsPDF, pdf-lib.js.

FindingConsensus (<https://findingconsensus.ai>)

A platform aggregating expert perspectives on California Senate Bill 1047's potential impact on AI development. Serves as a centralized source of informed opinions on the proposed legislation's effects on the AI industry. Frontend Stack: React, Next.js, Typescript, Tailwind CSS.

SeedFi (<https://app.theseedfi.com>)

A platform that provides simplified digital lending. Frontend Stack - React, Typescript, React Router.

Carduvy (<https://app.carduvy.com/>)

A gift card retail app that allows users to also upload and sell gift cards to other users in Nigeria. Frontend Stack: React, Typescript, Tailwind CSS.

Kwerty (<https://kwerty.io>)

A platform that leverages multiple global open datasets and uses a clean interactive view to provide actionable data to users. Frontend Stack - Vue, Vuex, Vue Router, Chart.js, GSAP.

TOOLS

- | | | | |
|---------------|----------------|--------------|------------------|
| ▪ HTML | ▪ JavaScript | ▪ Vue, Pinia | ▪ Figma/Adobe XD |
| ▪ CSS3 | ▪ Typescript | ▪ Nuxt | ▪ Git, GitHu |
| ▪ Sass/SCSS | ▪ React, Redux | ▪ Chart.js | ▪ Node.js |
| ▪ TailwindCSS | ▪ NextJS | ▪ Vitest | |

SKILLS

- **Time management:** Efficiently handled multiple projects while maintaining high quality standards.
- **Problem solving:** Resolved complex technical challenges across various projects by implementing innovative solutions.
- **Fast learner:** Rapidly mastered new technologies and frameworks to deliver high-quality solutions within tight timelines.

EDUCATION

University of Ghana
Bachelor of Science in Administration-Accounting Major
